## Capabilities

- Consulting
- Training
- Logistic Support
- Manufacturing
- Project Management
- Engineering
- Representation Services

Big Sky Aviation international **is committed to delivering quality products.** Whether a requirement calls for flight safety hardware, ground support equipment, helicopter underslung or airdrop/air transport by fixed wing aircraft, our customers can rely on Big Sky's experience, integrity and commitment to excellence.

# Big Sky Aviation International

## *Training*

Our Mobile Training Teams are **composed of former U.S. military training instructors**. We can conduct basic or comprehensive courses based on your needs and requirements. Courses can also be provided to train ground handling crews in lift load preparation, landing zone procedures, and underslung operating procedures.

## *Consulting*

At Big Sky, our consultants possess the experience and background, which will directly impact the success of your project. Our consultants work closely with our customers to **develop new ideas for products and have the expertise and advanced technology** to provide specification work upon request.

## *Aerial Delivery System Design*

If it can be dropped by air, Big Sky Aviation International **can provide a total product/support system**. Big Sky can produce a system customized to meet your unique requirements.

- Low Velocity Airdrop (LVAD)
- Low Altitude Parachute Extraction Systems (LAPES)
- Container Delivery Systems (CDS)
- Specialized Delivery Systems
- Helicopter External Transport

## *Air Transportability / Airdrop Qualification*

From start to finish, our specialists can guide you through every step of aerial delivery certification. Big Sky professionals **can design a comprehensive package** to include rigged load drawings, weight and balance calculations and measurements, restraint criteria, energy displacement material configuration, and slinging and tie-down requirements.

### **Manufacturing**

Three attributes describe why we excel in manufacturing – **attention to detail, precision, and consistency**. Big Sky has accumulated a broad range of technical skills and expertise that allow us to quickly identify projects that capitalize on the strengths of our manufacturing partners. Big Sky adds value to manufacturing programs through information management, process controls, logistics and technical expertise.

### **Marketing / Representation Services**

Big Sky's highly experienced and dedicated staff **possess extensive knowledge of both U.S. Government and International markets and regulations**. We can provide our customers an in depth understanding of the markets served and their changing needs. Big Sky has a comprehensive data library including engineering records, drawings, specifications and technical manuals.

Big Sky Aviation International **has established an impressive history of success built on solid business principles**. As a result, Big Sky is recognized as a leader in both domestic and international commercial and military logistic markets.

We invite you to **put us to the test**. Give us a call or visit us online today at [www.bigskyaero.com](http://www.bigskyaero.com) to find out more about our extensive product line, consulting, project support and manufacturing capabilities, along with our rigorous training and implementation programs. We have the ability and skills to economically meet your needs. Everytime.
